Gianluca De Nard is Head of Systematic Strategies at Swisscanto, managed by Zürcher Kantonalbank, where he leads a team of portfolio managers and analysts responsible for multi-billion systematic equity funds and FX overlay mandates. His core focus lies in the design, implementation, and management of rule-based investment solutions, with an emphasis on artificial intelligence, equity factor strategies, advanced risk optimization, and sustainability. In his role, he plays a central part in translating quantitative research and data-driven methodologies into scalable, transparent, and resilient portfolio solutions and products.

Gianluca is a Professor of Practice in Quantitative Finance and Systematic Investing at the University of Liechtenstein. With a PhD in Finance from the University of Zurich and academic affiliations at institutions such as NYU Stern, Yale University, and Copenhagen Business School, Gianluca brings deep expertise in financial econometrics and machine learning to the investment process. His research has been published in leading journals, including The Journal of Finance, Financial Analysts Journal, and The Journal of Financial Econometrics, and has received recognition such as the Engle Prize and nominations for the Swiss Risk Award.
